

GazOkay®

Your convenient gas leakage test device

GazOkay® Standby Mode

GazOkay® Test Mode

Minimize your risk of gas incidents & accidents

Maximum gas safety is the main concern of all gas appliance users globally. LPG is a very safe fuel to consume, however we all get shocked when gas incidents or even accidents happen. The GazOkay® leak test device is a new easy way to manage your risk concerns.

1 Instant gas leak test

GazOkay® will test your entire gas supply line instantly. Just press the knob and look at the built-in transparent window filled with liquid. It is easy to visually detect any gas leakage indication. Lack of gas bubbles in the window indicate a gas-tight installation. Visible gas bubbles indicate a gas leakage.

2 Flexible installation

GazOkay® is easy to install. It can be mounted at the inlet of your gas appliance, right after the regulator, or anywhere in the pipeline in-between – wherever you find the most convenient place of installation. You can choose between an upright or downward positioning version of the GazOkay® unit, whichever fits best with your gas appliance location.

3 Fits different setups

GazOkay® works with all types of gas cylinders and regulators as well as piped gas from a central supply system. It comes in several variants to easily fit different setups. You can choose between threaded connections or hose nozzle/sleeve/or compression fittings for easy installation.

As a global gas regulator manufacturer IGT takes pride in product quality & durable products. We support UN Sustainable Development Goals with special focus on 3, 12 & 13. An extended product lifetime reduces environmental footprint.

GazOkay® Standard

Accessory: Diode Light-Lamp

GazOkay® With Aluminum Wall-Table Bracket

GazOkay® Product Specifications

Approvals	Comply to DWGW G 5952 (pending certification)
Threaded connections	1/4" LH EN560 - 5/8" UNF ANSI/ASME B1.1 - 1/2" BSP EN10226
Nozzle connections	8mm - 9mm - 10 mm - 11 mm
Material	Plastic - Aluminum - Brass
WP max	100 mbar
Test pressure	2 Bar
Compression fittings	8mm - 10 mm - 3/8"

Always test your gas system before use GazOkay® makes it easy & convenient

Risk Statistics

USA:

7000 people are hospitalized every year when using gas-bbqs. Incidents are likely 10 times higher. 21 fatalities due to gas accidents.

- Incident rate 1:700 installations
- Accident rate 1: 7000 installations
- Fatality rate 1: 2 million installations

Data source: National Fire Protection Agency, USA

Europe:

In Europe the accident rate is higher in average than in USA due to the many gas systems in use. In EU indoor applications are also more widely used compared to USA.

Developing countries:

The accident rate in developing countries is 10-25 times higher than in USA.

Data source for Europe & developing countries: IGT estimation based on empiric observations
